Beautiful photos! Great book with lots of inspiring photos of the southwest. I love looking through this book and getting gardening aesthetic ideas, even though I don't live in this climate.

I didn't find this very helpful. The best book i have come across for our hot weather area (zone 9), antelope valley, southern california, is the one put out by home depot, 'landscaping 1-2-3'. and it's available on , but check for you applicable zone as it seems one book no longer covers them all.

Lots of horticultural advice, but also lots of ideas for layout, design and materials. We just moved to Arizona and it's very different! I bought two books, this one and a more expensive hard back designer book - I'd say this book is just as good, if not better. Lots of pictures, lots of advice, and lots of ideas that you can easily do yourself.

Book is lovely, great ideas but I was disappointed. As a new gardener to the Southwest, I need much more detailed info on how, where and when to plant as well as general care and maintenance for trees, shrubs and plants.

Excellent book with great details about the Southwest and how to grow the right type of plants. The Southwest is a difficult place to grow any kind of garden. This book gives you tips and the types of plants that will work best for the climate and soil types in the Southwest.

This is a great book, as are almost all Sunset books. However, buy the used ones. Save yourself some money. After reading this I understood what my landscaper was telling me about landscapes in Las Vegas.

I highly recommend this book for any southwest gardener. It has lots of great ideas, color pictures, and information on desert gardening. It certainly inspires one to put color into the garden both with plants and objects.

good ideas for container planting, and decorating front and back yards, was looking for more but don't regret the purchase
