The United States Air Force In Korea, 1950-1953 - Complete Coverage And Authoritative History Of All Aspects Of American Air Power In The Korean War

Synopsis

This important and comprehensive historical account of the Korean War and the American Air Force seeks to record the story of the air war as it was. The Korean War was the first in American history to be limited not by technology, or by the ability of the combatants to mobilize their military power, but by political design. The newly independent Air Force, shaped in the previous two decades by an increasing concentration on the strategic role of attacking an enemy's homeland, now faced a conflict almost entirely tactical in character and limited as to how and where airpower could be applied. Like the rest of the American military establishment, the Air Force was in no way prepared for battle at the western rim of the Pacific. Yet despite these limitations, the Air Force responded quickly and effectively, proving in many ways the utility of airpower in modern war. With virtually no warning, the Air Force injected itself into the war in the first critical week. It transported troops and equipment from Japan to Korea, evacuated American nationals, provided significant intelligence through aerial reconnaissance, and most importantly helped to slow the North Korean advance so that United Nations forces could construct a defensive position on the peninsula. For the next three years, American airpower contributed everywhere to the allied military effort; maintaining control of the airspace over the battlefield; disrupting enemy supplies and movement; supporting the ground armies at the point of contact with the enemy; transporting men and materiel at critical times to the zone of operations. Futrell describes all of these operations with a clarity and a balance that have since become a model for official military history. Even better, he has analyzed the operations, interpreting their significance overall to the course of the conflict and their importance in the application of airpower to modern war. He shows the effects of close air support in enemy killed, supplies denied, and the turn of battle; he assesses the success or failure of various strategies, tactics, techniques, and methods; he emphasizes the difficulties the Air Force faced and how the challenges were met and overcome. Futrell details the modifications to doctrine and procedure, the changes in organization necessitated by distance or shortages in men and equipment, or by austere and inadequate fields and facilities. And in Dr. Futrell's skilled hands, analyses of failures teaches as much as examinations of successes.

Air Mission Accomplished A degree of calculated risk is involved in the preparation of any history of recent events, and this historyâs written at Maxwell Air Force Base, Alabama, in the months between March 1957 and November 1958âs is no exception. The passing of time and the completion of definitive Army and Navy service histories of the Korean war will undoubtedly provide additional historical perspective which was not available to the author of this USAF history.

Purchased it for research and it pretty much hit the areas I sought.

This book is the classic official USAF History of the Korean air war, and it is very well done. Great maps, charts and lots of photos, plus easy to read text makes it worth the effort. Buy it!!

Well-researched, comprehensive, and somewhat over-whelming portrayal of the US Airway in Korea. A very good reference book, but seems a little dry due to the detail. Is a 'Buy' in my opinion.

This book contains gobs and gobs of facts, arrayed in only the most general chronological order. It also dates to 1958, so is not very current. While it is useful for a historical researcher, it is a dry and brutal slog for the general reader.
