I enjoyed the premise of this story and believe it to be extremely plausible. The author writes his thoughts about a cure for cancer and what all the medical and pharmaceutical would do...cover it up, of course, as a cure would cause this group to lose trillions of dollars of profit and many jobs within the sector. My friends and I have had the same discussion and believe the above statement

to be true. In *Lethal Misconduct*, Cal is fired from SSI and goes to work for the President, who allows him to set up a new company and staff it with troops of his choice. He sets up this new group near the campus of the University he had attended in Virginia prior to joining the Marine Corps and hires most of the characters from SSI. Their first mission is to investigate rumors of a group building biological weapons within the U.S. The bad guys have ties within the government and are led by a former Army Colonel and his trusty bodyguard (a former Secret Service agent). They are funded by billionaires and CEO's of several larger pharmaceutical companies. The doctor who had originally developed this possible cure for cancer, after visiting with a witch doctor in South America, was testing it on terminally ill patients and found them cured within a couple of days. However, his former employer - the Colonel - had stolen all of his work but was missing one piece of the puzzle. The good doctor is on the run and hiding from the Colonel's henchmen - no longer trusting his old boss. As fate has it, Cal's team stumble across the good doctor and agree to help him. The billionaires are being duped and only three of the dozen people involved in the success of this plan have different agendas once they get the missing piece and complete this new drug. However, it's not planned as a cure - instead they are making a biological weapon and plan to launch it in the middle east. Having finally come upon this new plot, Cal and his team race to stop the implementation of this deadly threat. *Lethal Misconduct* is one of the better books within the series and I highly recommend it. In fact, I stayed up late and finished the book in a single sitting - just couldn't put it down! Looking forward to reading the final published book in the series and the new ones promised for next year. Great job Mr. Cooper!

C.G. Cooper is an excellent writer and I strongly recommend anyone who likes military thrillers read all his books. In addition to being a really talented writer, he is a very personable guy and has strong interaction with his readers. If you like this genre you really need to read his "Corps Justice" series books and I suggest you read them in order just to put some context into each book. I'm posting the same review for all his Corps Justice books because I feel very strongly about them and the short shorties he has written to fill in the gaps.

How could any human oppose a world free of the devastating ravages of cancer? In this 6th Corps Justice Series Book, Mr. Cooper provides a viable, exciting platform to present this unthinkable scenario--opposing the eradication of cancer-- he also presents the equally viable and (shockingly realistic) motivation for this opposition as being fiscally/financially based--That is, Trillions of dollars would immediately be eliminated from our medical care economy, including patient care and

pharmaceutical research, development, and sales.....not to mention the unthinkable numbers of lost jobs and the resulting revenues from peripheral sales and taxes. I respect and most times enjoy the tactics and activities of Cal' and his (mostly Marine Corps-experienced) buddies; though as I read each Series Book , I hope for less (at times overdone) allusions to the prolific perfection that being a member of that "Semper Fidelis" fraternity seems to impart--Note that many of my favorite people are Marines, including my brother, Brig. Gen., Retired; my son, Lt. Col.; my brother in law, Captain (deceased); one of my closest friends, Captain. So, though I was Army, my respect and admiration for the capabilities and dedication of those who have experienced the brotherhood imparted by "Semper Fidelis" run deeply. I would probably enjoy this Corps Series reading 4, even 5 stars, with a little more (personal) recognition of the heroes portrayed by Mr. Cooper...But...I'll be reading 'em all. Thanks Mr. Cooper!

First of the 10 book Corps Justice series I've read, and while I was a bit lost initially with this government/medical conspiracy book it did click in for me at about a quarter of the way in and then it was off to the races! Villains were spot on, plot was engaging and I ripped thru it in no time given the low page count. If you're looking for a quick, simple thriller then this makes for a fine read!

I got started on the Corps Justice series with the first 3 book bundle about 2 weeks ago. At the end C.G. Cooper offered a free book to subscribe to his newsletter, which I did. The problem was I just kept buying the next book when I finished the one I was reading. I would of finished sooner but I had guests visiting from out of town. The books were action packed from the beginning. There were just enough twists in the story to keep you thinking but not so many that you lose the plot. I found that the story had just enough references to current events to make you wonder if the plot could really happen today. To be honest I'm a bit biased. I'm a former Marine and always like stories with Marines but these characters are well developed throughout the series. I'm looking forward to the 7th book. If you like the series signup for his newsletter. I like where he lets his fans review and proof his future book as he's writing it. Semper Fi

Cooper's "Lethal Misconduct" could have been written in tomorrow's headlines. With all the advances being made in molecular science, this story could occur at any time. Cooper gives us an action packed story line from start to finish (or is it finished?) .

I have read throught the first 6 books and i can say after the first two chapters of the first two i was

hooked instantly. If you like covert operations and patriots of america you should consider this series at least read the first one and go from there. I cannot wait to read the rest!
