"Godfrey frequently draws from myth and folklore and cites cases from history and pop culture, demonstrating extensive knowledge of her subject matter. The book will prove a handy encyclopedia for enthusiastic cryptozoologists of all ages." — "Publishers Weekly"[Godfrey]'s most

satisfying book to date...Monsters Among Us is way more than a collection of camp-fire tales of bloodthirsty werewolves, rampaging Dogmen, and mystifying activity. It keeps the reader captivated and skilfully plunges them deep into the heart of the mystery. By heading down a winding path marked "Paranormal Phenomena" and "Fringe Science," Linda has made the most significant steps in this area since John Keel got the UFO- and monster-hunting communities coming out in rashes by daring to suggest the things they sought- and much more "were part and parcel of the same thing."--Nick Redfern, author of Women In Black and Bloodline of the Gods "She has the ability to send chills up and down your spine." "Brad Steiger, author of Real Ghosts, Restless Spirits, and Haunted Places

LINDA S. GODFREY is one of America's foremost authorities on modern-day monsters. She is the author of over a dozen books on werewolves, hauntings, and the paranormal, including Real Wolfmen: True Encounters in Modern America, American Monsters: A History of Monster Lore, Legends, and Sightings in America, and Weird Michigan. Godfrey has appeared on many national TV shows such as The History Channel's Monster Quest, Inside Edition, and Sean Hannity, and has been a guest on radio shows such as Coast to Coast AM.

I enjoy Linda's books a lot. Its nice to think there may be more out there then the mundane world.

Very, very interesting...totally held my interest!!!!

A very interesting collection of accounts...

As a child of the 1960s I feel very fortunate to be able to see where such studies have come, to where they are today. It's exciting to see such groundbreaking research such as Mrs. Godfrey's continually fill in the gaps the so-called scientific community has failed the world in.

This is the second book by Linda Godfrey I have read, and I must say that I have enjoyed it very much. I like her analytical approach to the subject and her respect for the people who have given her their stories. Personally, this is a book I found hard to put down. I do realize that liking a certain genre of books is subjective, but if you are into true paranormal stories, then I think you would enjoy this book. There are some head-scratchers, for sure, and some stories will really make us think that

the world is more than we know. One think I know for sure is that I don't want to be out in deep woods at night by myself without at least the U.S. Army with me.

Linda Godfrey is my cryptozoology idol. This book is spooky, wonderful and very well researched, like everything else Linda does.

To see Mrs. Godfrey step out into the bizarre is fun!!! I loved this read!!!

Interesting book. Fun read. True monsters? Your choice.
