# The Stairway To Heaven: Book II Of The Earth Chronicles (The Earth Chronicles)

## Synopsis

Since earliest times, human beings have pondered the incomprehensible questions of the universe, life . . . and the afterlife. Where did mortal man go to join the immortal Gods? Was the immense and complex structure at Giza an Egyptian Pharaoh's portal to immortality? Or a pulsating beacon built by extraterrestrials for landing on Earth? In this second volume of his trailblazing series The Earth Chronicles, Zecharia Sitchin unveils secrets of the pyramids and hidden clues from ancient times to reveal a grand forgery on which established Egyptology is founded, and takes the reader to the Spaceport and Landing Place of the Anunnaki godsâ"Those Who from Heaven to Earth Came."

## Book Information

Mass Market Paperback: 464 pages

Publisher: Harper; Reprint edition (March 27, 2007)

Language: English

ISBN-10: 0061379204

ISBN-13: 978-0061379208

Product Dimensions: 4.2 x 1.2 x 6.8 inches

## Customer Reviews

âBrilliant and explosive.â (Erich von Daniken, author of CHARIOTS OF THE GODS)âA dazzling performance...Sitchin is a zealous investigator.â (Kirkus Reviews)âCompelling.â (Booklist)âImpressive.â (UPI)âAn intriguing book--read it...Sitchin is to be congratulated...He makes his point, and makes it well.â (The British UFO Research Organization)âEnthusiasts of ancient lore and pyramid studies will find this book fascinating food for thought.â (Charleston New Courier)

Zecharia Sitchin is an internationally acclaimed author and researcher whose books offer evidence that we are not alone in our own solar system. One of a handful of scholars able to read the Sumerian cuneiform tablets, he has combined archaeology, ancient texts, and the Bible with the latest scientific discoveries to retell the history and prehistory of mankind and planet Earth. His

trailblazing books have been translated into more than twenty languages; his first one, an oft-quoted classic, celebrates the thirtieth anniversary of its publication. A graduate of the University of London and a journalist and editor in Israel for many years, he now lives and writes in New York.

Zecharia Sitchin exposes a whole new world of knowledge and its sources in all of his books. I recommend all to purchase all of his books about the true ultra ultra ancient history. The Stairway to Heaven provides yet another chapter in his revelations. Sitchin notes in this book how the pharoes fraudulently claimed they built the great pyramids, when they were built much earlier in history. Later he notes words of Moses. However, Moses was also of the age of the Pharoes; but the age of the Annunaki of record in Sitchin's works were thousands of years earlier. This does not lower the quality of the work, as there are many tablets written or sponsored by the Annunaki which denote teaching about forms of stariways to heaven. It was the Annunaki who gave us 10s of thousands of ceramic form of tablets that date back thousands of years before the flood. Does not seem to be a broken history of the ultra ancient past. Only a broken history of the more recent eons.

The second part of The Earth Chronicles is the continuing story of the ancient history of planet Earth and how humans came to be here. Zecharia Sitchin is an accomplished linguist and researcher. His academic conclusions are brilliant and his work is interesting and thought provoking. I would like to see his theory presented in secondary schools. I would recommend this read to anyone who seeks.

I really enjoyed learning about the ruins of Baalbek, a topic I previously knew nothing about. I also enjoyed learning about how the discoveries of the early archaeologists in Egypt. Their findings ranged from accurate to misunderstood to intentionally deceptive for the sake of their own egos, yet regardless of accuracy have shaped the modern perspective on Egyptology. You can really sense the passion and excitement of discovery in Sitchin's writing. To fully enjoy this book you must share at least some of that passion as well. At times I found it to be a bit long winded as he kept adding fact after fact leading up to proving his points and explaining his theories. But once he finally gets to those points, its usually something pretty cool. I definitely had more fun reading the first book in this series, but I did thoroughly enjoy this one as well. I will continue to read the books in this series.

amazing book that is for a broad minded, intelligent person who is interested in how the pyramids around the world have been made. It goes into subjects that proves, as in the bible, really, that there were people here before us.

An interesting book. Well written but kind of gets bogged down in the lineages of biblical families. I would recommend it.

Stairway to Heaven (S2H) is a continuation of the 12th Planet series of books. It is recommended that you read the 12th Planet by Zecharia Sitchin before starting this book. That book starts with Sumer and its writings and legacy. All of the mythology that we have down to modern time seems to be a repeat of the Sumerian stories (with the names changed). In S2H, Sitchin continues with the ancient visitation theory - the purpose to mine and export gold, silver, copper etc back to the 12th planet. The S2H is the explanation of the transportation and communications systems that helped move the raw materials to the various spaceports (before and after the Deluge - let's call that 10,000BC - around the end of the last ice age). How do the Giza pyramids, Jerusalem, Mt Ararat, the Sinai peninsula and Ba-albek together? The author shows one interpretation. Sitchin's work traces through the older version of the Bible, Sumerian, Akkadian, and Egyptian stories to piece together an interesting story of his version of history. He also goes through how our history of witnessing the gods of old (human visitors with space ships) shaped our view of life, the afterlife and immortality.

It bridges the gap between science and the Bible plus all of the 12 God religions as well as all the eastern & Western ancient civilizations and the origin of man, his weaknesses, strengths, evolution gaps. It even explains how it fits in with Native American ancestry from the sky as well as the reason God" struck down the Tower of Babel (Babylon) and why and how it hobbled humanity. It strongly hypothesizes why we were created + why records of it were buried in the Sumerian ruins, It surmises that beings from the sky existed and were called angels goblins giants and so forth, The book appears to be evidence based with photos of hieroglyphics, races of hybrid humans, And evidence hard core evidence of an advanced intelligence that was on Earth in our past, It explains Noah's flood but it's still a work in progress, We are finding evidence everyday.

Every book in the Earth Chronicles series is a delight to read. You may not agree with all of Sitchin's theories regarding Nibiru and the Anunnaki, but his chronology of ancient history and global events is spot-on, and his understanding of Sumerian mythology and language is impeccable. Regardless of the personal conclusions you arrive at after reading his work, I can certainly guarantee that you will also come away with a much greater sense of possibility for our ancient past, and the realization that there is much, much more to our history than we've ever been led to believe. In my opinion, it is

the great work of researchers like Zecharia Sitchin and others that will ultimately bridge the gap between evolution and creationism, and finally reveal to us the long-hidden truths about our celestial origins.
