Customer Reviews

The quality of this logbook is great. My husband has been purchasing this book for as long as he has been flying. The only thing is that the columns have changed since he last purchased his logbook. His current logbook still has 19__ in the date section. I hope he can get used to this new lineup. Difficult for some pilots to get used to changes, lol. The cover is sturdy and thick. The pages seem thick and the print seems consistent throughout the logbook.

It sucks, I ordered the same book I got a few years ago, this new one has the same parts number but it half as many pages and the layout sucks, it's almost worthless and makes no sense for a log book. DO NOT BUY!!!

Great value, perfect master log

Ordered this for my husband after he did research and decided this was the book for him. A very big decision and not an easy one since this is only his 3rd book in all his many piloting years. He couldn't find the exact same one he had for the last 20 years and I thought for sure there was going to be a meltdown. lol As we know, men don't like change and I mean that in the nicest way. But he has switched gears and tells me he has adapted and like it.

I'm a bit confused why anyone is complaining about the quality of this item, I can only assume the previous version had thick embossed pages, as this current version has a high quality paper with well laid out pages which are easy to use, and will weather the test of time (some other reviews seem to suggest the pages are made of tissue paper, which just isn't true).

Not the same format as your previous version. Check before you buy.

I didn't think that the size is big as ipad

The product was delivered in a few days but I did like how the website tries to lure you into a free delivery and a discounted price by charging you \$70. It is easy to fall into that trap by your design.
