Mission Command: The Who, What, Where, When And Why An Anthology

Synopsis

In the chaos and uncertainty of modern war, our troops must be empowered to make decisions, take the initiative, and lead boldly. This is Mission Command: a command culture, leadership style, and operating concept that has been embraced by armed forces the world over. While the U.S. Military and many of our allies have formally adopted Mission Command, much work remains to truly understand and implement this style of leadership. In this anthology, 12 authors from 3 nations (United States, United Kingdom, and Norway) offer diverse perspectives on the topic of Mission Command as it relates to their service in the military, law enforcement, government, and private sector. Real-world examples supported by in-depth research provide the who, what, when, where, and why of Mission Command, identifying opportunities to improve how we lead our teams. Topics and authors include: - Unit Cohesion (Joe Labarbera) -Mission Command at Sea (Tommy KrabberÃ_d) -The Historical Evolution of Mission Command (Donald Vandergriff) - Improving Army Doctrine (Regina Parker) - Military Campaign Analysis (Gerry Long) - Organizational Culture (Thomas Rebuck) -Mission Command in Garrison (Darrell Fawley) - Training and Leadership for Mission Command (Chad Foster) -Mission Command and Complex Operations (Grant Martin) -Fitness and Mission Command (Daniel Markert & Scott Sonnon) -Civil Policing and Mission Command (Fred Leland) ...and more!

This anthology accomplishes what dozens of books and official manuals have tried and failed to define; the true meaning of "Mission Command" by revealing in fourteen concise essays the term, originally stated in its German format as *Auftragstaktik* is a military culture of leadership where "knowledge, independence, and the joy of taking responsibility" reign supreme. The message contained in the pages has utility for not only the military, but in reality all aspects of life by infusing the idea that taking responsibility leads to joy regardless of the circumstances. I would heartily recommend this book to everyone in all branches of the military, as well as the public at large.

I have never served in the military, but I have led personnel in the private sector. This book is based on adaptive leadership and empowerment principles that have worked well in the private sector and provides a case for using it AGAIN in the military. The German Auftragstakik term is a leadership style that can be applied to any form of management. With statements like "Today's armies are often shackled by the fear of risk, and the inability of command to defer that risk down to the tactical operator" it's not so different when you peer into the private sector. While this book is geared to military minds, leaders reading this from the private sector will walk away with lessons that they can apply.

This book first and foremost addresses military leaders but it is also useful for law enforcement, fire fighters and anyone else who wants to understand and practice rapid decision making and the philosophy of Mission Command. As this is an anthology not all articles are of the same high standard. The book nevertheless deserves five stars because it is a pioneer work that features an excellent introduction into the problems of the US military today, an historical discussion about when and how Mission Command was used and several articles by professionals on how to train for it today. In the footnotes the book also offers a wealth of additional reading on the subject. Thus, anyone who is in a leadership position, or trains leaders, should buy this book.

I won't say this is a light and easy read - although some chapters, like Regina Parker's, are clear, concise and tight as a drum - nor will I say it's a joyous read - some chapters will have you grinding your teeth with frustration over how the military is run - but it is inspirational and highly important for the future of our nation and for the future of your career as a leader. I will even step out on a limb to say that this is the most important book published so far this year. It is a must read for any military officer and NCO and a force multiplier for any business leader navigating a complex or competitive market. -Captain John Konrad, Author of Fire On the Horizon
