I Want You To Know

Synopsis

We all know that we should document what we want if we should become seriously ill or injured. We know that it would be an unbearable hardship for our family members to have to make decisions about our lives if we were unable to speak for ourselves. The problem is that we don't know where to begin. *I Want You to Know* is a comprehensive workbook that will guide you through every stage of preparing a legacy plan for yourself. In addition to a complete blueprint, you will also read touching stories from people who experienced the difficulty of losing someone close to them with no plans in place. You'll also read about people whose lives were enriched when they discovered that everything had been documented for their loved one, so all they needed to do was follow their plan. "All we are doing throughout this book is projecting ahead to the days when we may not be able to speak for ourselves, when we may not be able to communicate. It's important that you have the opportunity to be comforted in the ways that work best for you. It truly is a loving act to share these ideas with those that will be looking after you." ~~Author, Leslie Cottrell Simonds
If you want to be able to say that you had a life well lived, then this is the right book for you!

Customer Reviews

I want you to know is a book each of us should not only read, but work through. She clearly understands the profound impact the dying process, death, and subsequent grief have on our lives. This book will guide you through everything you need to consider in preparation for your own death or death of a loved one! She helps break down the walls of silence around death and dying and offers support for everyone! As she says in her book. 100% of us will die! That makes this book relevant for all of us.

When I started reading I new this book was for me. I've been going through life not understanding how to prepare for the other life God has planned for us. As I kept reading I grew to understand how much It means to prepare for eternity. I felt like I was learning who Leslie was and how she became comfortable with knowing how to deal with it. She explained how to prepare and understand the level of comfort and compassion for yourself and your loved ones. Excellent read and look forward to reading more books from her. Thank you and keep up the great writing. ã Â Â“Â

This is an amazing and important piece of work. Thank you for such a great resource, and sharing your story Well Done

I met Leslie at Shambhala Mountain Center in Colorado where we were attending a Grief Healing Workshop. We became immediate and fast friends as we shared our journeys with holistic healing. Leslie generously gifted me her book, "I Want You to Know," and it is laid out in such an easy-to-use format for end of life planning, which I am working through. This wasn't just a gift to me, it's a gift to all my family and friends who will remain after I die, and I want to spare them the complications of closing down my business and personal affairs after I'm gone. The stories in the book are very touching, both from people who realized that one day they would die. . . and those who did not. Death is a natural part of the life process, and we can make it easier for those we leave behind (and we'll all leave loved ones behind) by making plans now, while we're living. Leslie shows us all the things we might not think of to do, which can give us peace of mind so that we can befriend the next transformation of our soul's journey, whatever that may be. I highly recommend this book and appreciate all the careful thought Leslie put into it.
