# Grimorium Verum

## Synopsis

Grimorium Verum is one of the most notorious handbooks of black magic -- one of the few that deals openly with spirits of darkness. People have long sought the aid of non-physical beings; the biblical king Solomon in particular had a reputation since ancient times for commanding demons. There are many texts purporting to reveal Solomon's methods, but most are extremely complicated and difficult. Grimorium Verum is one of the easier texts, but also one of the most sinister. It includes a catalog of specific demons and how to draw on their powers. This new critical edition includes a fresh translation based on all the major sources, complete French and Italian texts, and 5 other appendices.

Impeccably interesting and a great read, I recommend it to anyone with an interest in the occult.

Good stuff. Interesting. Occultists seem to pray to Jesus a lot. They use demons as slaves rather than worship them.

A beautiful book with lovely illustrations and info. Makes a fantastic addition to your collection of spell books! Perfect gift for the wild and witchy!

wow, crazy book, very detailed, I bought it as a conversation piece and for reference, not planning on doing any Black magic.

This will surely be a good read and then some. I am impressed with this author's hard work put in. Looking forward to more.

Seems to be pretty complete, research was done very well and all referenced materials are explained via foot note throughout also justifying and explaining included/compared material. Excellent work

I had the opportunity to study this book when I went to high school, but I had to return it and I could never buy it in that time. This version is definitely better than the first time I read. The book has much more information, including a version in French, which gives a special touch to this work. The erudition of this work is evident, being this aspect one of for those that more I am grateful to its author.
