Criminal Investigation: A Method For Reconstructing The Past

Synopsis

This text presents the fundamentals of criminal investigation and provides a sound method for reconstructing a past event (i.e., a crime), based on three major sources of information â• people, records, and physical evidence. Its tried-and-true system for conducting an investigation is updated with the latest techniques available, teaching the reader new ways of obtaining information from people, including mining the social media outlets now used by a broad spectrum of the public; how to navigate the labyrinth of records and files currently available online; and fresh ways of gathering, identifying, and analyzing physical evidence.

Customer Reviews

"This seventh edition of a text for criminal justice students contains a new section on the use of technology in criminal investigations, with new material on finding info in social media and searching online files and recordsâ |The new sub-section on technology covers high-tech and IT crime, as well as legal issues related to getting info from personal and workplace computers, websites, chat rooms, and Internet service providers."-- ProtoView.com, February 2014 "The seventh editionâ |presents the fundamentals of criminal investigation and provides a sound method for reconstructing a past event based on three major sources of information â “ people, records and physical evidenceâ |Students and beginning professionals in criminal justice will find new ways of obtaining information from peopleâ |Special topics in terrorism, organized crime, and white-collar crime round out this complete guideâ |"-- The Journal, Fall/Winter 2013 "This seventh edition of a text for criminal justice students contains a new section on the use of technology in criminal

investigations, with new material on finding info in social media and searching online files and recordsâ [The new sub-section on technology covers high-tech and IT crime, as well as legal issues related to getting info from personal and workplace computers, websites, chat rooms, and Internet service providers."-- Reference & Research Book News, December 2013

James W. Osterburg was long involved in the investigation process, actively engaged in the functions of teaching, research, and public service. For 20 years, Osterburg served as a sworn member of the New York City Police Department (NYPD), where he assisted in the investigation of thousands of serious crimes. He testified in municipal, state, and federal courts on numerous occasions, and taught at the NYPD Police Academy. His academic affiliations include professorships at the University of Illinois at Chicago (Professor Emeritus); Indiana University; the University of California, Berkeley; the Baruch School of Public Administration at the City University of New York; and Sam Houston State University (as Beto Professor of Criminal Justice). A frequent participant in educational symposia, he discussed criminal investigation, criminalistics, fingerprint characteristics, and scientific evidence, and authored books on criminalistics and scientific investigation. His articles were published in a variety of scholarly journals, including the Journal of Criminal Law, Criminology, and Police Science; the Journal of the Forensic Sciences; the Journal of the American Statistical Association; and the Journal of Police Science and Administration. A Fellow and past president of the American Academy of Forensic Sciences, Osterburg served on the ad hoc committee appointed by the Academy president to review the homicide of Robert F. Kennedy and to help resolve the controversy that arose subsequent to the conviction of Sirhan B. Sirhan regarding some of the firearms evidence. Most recently, Osterburg was awarded the 2010 Paul L. Kirk Award, the highest award conferred by the Criminalistics Section of the American Academy of Forensic Sciences (AAFS), and was named a Distinguished Fellow Honoree at the 2012 AAFS conference. Richard H. Ward is currently Associate Vice President for Research and Special Programs at the University of New Haven. He recently left the position of Dean of the Henry C. Lee College of Criminal Justice and Forensic Sciences there. A former New York City Detective, Dr. Ward is an internationally recognized expert on issues related to criminal investigation and global crime.

I love this book! It is incredibly resourceful and is packed with information, 100% worth it!

Great study guide but needed to be more pages to it. It helped a lot ,easy to read and very educational.

A very detailed book

I just finished this course in the Master's program I must say it was very informative and gave me a better understanding of the subject!

The book itself is in great shape except for the sticky stuff holding some pages together. The text is important but a good book to put you to sleep.

Just what I needed for my class.

Very helpful

I bought this book to assist my sister and I in writing our first novel, a murder mystery. It has been a most helpful research item.
