Woodworking: 10 Awesome Things You Can Build With 2x4s

Synopsis

Getting Your FREE BonusDownload this book, read it to the end and see "BONUS: Your FREE Gift" chapter after the conclusion.Woodworking (FREE Bonus Included)10 Awesome Things You Can Build With 2x4sWelcome to the D.I.Y. Woodworking: 10 Awesome Things You Can Build With 2x4s, a D.I.Y. book designed to show you how great 2x4s can be if you truly want to make use of them. This book covers a wide range of projects from the easy to the more complex. This book also tries to use only 2x4s and the necessary tools to make the projects while doing the best to not use other materials.First we'll start with a couple of projects that really stretch what you can do with 2x4s: How you can build a Stepping Stool so that you can get to that extra space above you Take your food outside by building a Picnic Table Completing the set with a nice universal Bookshelf Then we'll cover how you can make some homemade weapons from the East and one from the West so that you can practice with them or someone you know would love them as a gift. We'll also cover some more helpful projects like making an old fashion cane that you can use as a base for carving something fantastic and a sturdy walker that you can provide some old fashion some old fashioned support.The remainder of the book will cover: How to make a wheelchair almost entirely from wood with some basic geometric shapes and lever design. How to turn 2x4s into classic, old wood flooring that could look great in a furnished room. These are 10 Woodworking projects that you can use to amaze anyone right off the bat most of the time and will serve an important function in someone's household. Some of these projects are extremely complicated while some others are really simple, but it's all a matter of working perspective, a woodworking perspective.Download your E book "Woodworking: 10 Awesome Things You Can Build With 2x4s" by scrolling up and clicking "Buy Now with 1-Click" button!

Customer Reviews

Any woodworking book that lists nunchucks as an "awesome thing to build from 2x4s" is simply not worth the time it takes to download. I was expecting "how to" type information for things that fall in the realm of adult woodworking - this is nothing more than someone rambling on about ideas for things to make out of wood... if you are serious about woodworking, or serious about learning woodworking skills... this is definitely NOT worth your time.

This is a total and complete joke. There are no plans . There is a picture of a picnic table and a step stool . A complete and total rip off.

The concept is ok and for \$1 you cant or shouldnt expect much. But come on at least a picture of the finished product to better get an idea of what it is.

Spoiler alert. Caveat emptor. For \$0.99, it would be nice if the author build a table...of contents. For the avid woodworker limited to an endless supply of 2x4's with a side love of martial arts weapons and a thing for quoting Napoleon Dynamite, this book would be sweet. I caution those seeking the perfect gift for the elderly recipient of their choice, reconsider the sweet oldy-timey cane plan unless serious injury or death are desired, what with wills and ulterior motives and all.

I would have liked som illustration. Not much step by step in the book either. Don't think you will have much luck making items
