Sheet Metal Stamping Dies: Die Design And Die Making Practices

Synopsis

Finally, in a single volume, a reference that presents engineering-level information on press-working sheet metal, die design, and die manufacturing! Concentrating on simple, practical methods, this book will be an invaluable resource for anyone looking for detailed information about die design and the manufacture of stamping dies, particularly practicing die designers, press engineers, tool and die maintenance technicians, students of die design, and advanced apprentice die makers.

Features Emphasizes the basic theory of sheet metal plastic deformation as an aid in understanding the manufacturing processes and operations that are necessary for successful die design. Features the essential mathematical formulas and calculations needed for various die operations and performance of die design. Illustrations feature complete assembly drawings for each type of die. Provides a complete picture of the knowledge and skills needed for the effective design of dies for sheet metal cutting, forming and deep drawing operations, highlighted with illustrative examples. Provides properties and typical applications of selected tool and die materials for various die components. Offers a complete picture of integral CAD/CAM systems for die making, EDM machining, and wire EDM practice

Book Information

Hardcover: 300 pages

Publisher: Industrial Press (August 3, 2012)

Language: English

ISBN-10: 0831134631

ISBN-13: 978-0831134631

Product Dimensions: 6 x 0.6 x 9 inches

Shipping Weight: 1 pounds

Average Customer Review: 4.4 out of 5 stars 3 customer reviews

Best Sellers Rank: #701,935 in Books (See Top 100 in Books) #167 in [Books > Engineering & Transportation > Engineering > Materials & Material Science > Metallurgy](#) #376 in [Books > Engineering & Transportation > Engineering > Mechanical > Machinery](#) #480 in [Books > Engineering & Transportation > Engineering > Industrial, Manufacturing & Operational Systems > Manufacturing](#)

Customer Reviews

Â Vukota Boljanovic has spent more than 35-years in applied engineering in the aircraft and automotive industries and also in education. He has B.S., M.S. and Ph.D. degrees in mechanical

engineering and worked in Europe for many years in both academia and industry. He is the author of five books, including from Industrial Press, Sheet Metal Forming Processes and Die Design (2004) Die Design Fundamentals, Third Edition (2005), Applied Mathematical and Physical Formulas (2006) and Metal Shaping Processes (2009). He has contributed updated practical material on sheet metal design, including punches, dies, and presswork, and on manufacturing processes to Machinery's Handbook, 28th and 29th editions. Vukota has written numerous technical papers and has been recognized by the aircraft industry and academia for several of his contributions to manufacturing processes. Before recently retiring, he spent five years working in the American automotive industry.

Everything you ever wanted to know about sheet metal stamping dies. Excellent reference even for the experienced. Well worth reading.

Possibly a bit too advanced for the average hobbyist but everyone interested in this topic will get something out of it.

In perfect conditions...
