International Comparisons Of Electricity Regulation

Synopsis

This book offers the most comprehensive characterization assembled to date of the historical, institutional, and economic forces affecting electricity regulation. Eminent economists organized by the University of California Energy Institute survey the US, UK, Scandinavia, Latin America, France, Germany, Japan, Canada, New Zealand, and Yugoslavia. Recent experiments with privatization, competition, and restructuring in electricity are contrasted with instances where government ownership and traditional vertical integration still dominate. The introductory essay by Richard J. Gilbert, Edward P. Kahn, and David Newbery synthesizes individual country studies.

Book Information

Hardcover: 516 pages

Publisher: Cambridge University Press (May 31, 1996)

Language: English

ISBN-10: 0521495903

ISBN-13: 978-0521495905

Product Dimensions: 6 x 1.3 x 9 inches

Shipping Weight: 1.9 pounds (View shipping rates and policies)

Average Customer Review: 4.0 out of 5 stars 1 customer review

Customer Reviews

"...delves insightfully into the electricity industries of some countries that have moved to restructure, such as in Scandinavia, the Southern Cone countries of South America, New Zealand and the U.K.; as well as those that have not, such as Germany, France and Japan. This book, rich with data and history as well as current movements and prospects, provides a wealth of information about the electricity industries of these countries, in many of which U.S. firms are now investing substantial capital." *The Electricity Journal* "Electric power sectors around the world are going through dramatic changes. This book provides an interesting and useful set of papers that examines the organizational, ownership and regulatory structures of the electricity sectors in a diverse set of countries. It explains the problems these sectors have faced, why and how they are changing in response to them. Must reading for anyone interested in understanding the changes taking place around the world in this important infrastructure sector." Paul L. Joskow, Massachusetts Institute of

Technology"Rnternational Comparisons is a useful resource for the researcher or teacher with an interest in public utilities." Stephen H. Karlson, Journal of Comparative Economics

This book offers the most comprehensive characterization assembled to date of the historical, institutional, and economic forces affecting electricity regulation. Eminent economists organized by the University of California Energy Institute survey the US, UK, Scandanavia, Latin America, France, Germany, Japan, Canada, New Zealand, and Yugoslavia. Recent experiments with privatization, competition, and restructuring in electricity are contrasted with instances where government ownership and traditional vertical integration still dominate. The introductory essay by Richard J. Gilbert, Edward P. Kahn, and David Newbery synthesizes individual country studies.

This book brings a good source for some process of electricity industry reforms around the world. It's based on several works from different authors who makes his contribution to a single case (country/region). The author gather together to brings to reader an excellent source for make comparisons.
