Carolyn Vosburg Hall is an accomplished author of 14 books on arts and crafts topics, including Sewing Tiny Toys and Christmas Ornaments. She has written for Threads magazine, Fiber Arts magazine, Woman's Day, and many other US magazines and local newspapers.

Yes, this book has some of the usual culprits, like an elephant, a pig and such, but it also has more unusual animals like a ram, and ostrich and a horseshoe crab! (Under "Q" of all things.) If you want to get away from the ordinary stuffed toys, or, as in our case, want to expand beyond teddy bears, check out this book.

Carolyn's designs are outstanding to say the least! It's a shame that this appears to be out of print. It is concise, well photographed, colorful, ease of layout. Any most soft animal design techniques are easily found in these pages if you simply study the patterns and photos. Okay, yes, the book is patterns but really, it is so much more and my favorite out of my extensive library of these types of

books.

This is by far the best pattern book for animal. I have looked all over for patterns to make for classic children's books and this book is just what I have been looking for, Thank you.

I searched for a long time in bookstores, libraries, and even online before I found the perfect patterns, and this book has them! Experimenting with materials and eye positioning to create different looks also gives you much more when it comes to your "collection." The only complaint I would have is that I can't find more books by the same author for other animals, 'coz I sure love the results from the patterns she has in this one. Really a wonderful book for anyone who wants to sew nice-looking stuff toys.

This is an incredible book for anyone who wants to make Stuffed Animals. The directions are clear. The patterns are sizeable and the basic constructions you will learn using this book will help you to create original animals for your ark. Based on your fabric choices the animals can look very realistic (especially the unicorn) or can be fantasy animals. There is something for everyone. There is a yak I love. The walrus can be sized to be used as a children's chair.

Charming and worth this book has some great patterns this is my favorite

Insightful for all levels of experience. Beautifully presented with great creature projects. Wonderful book for those of us who love more realistic animal proportions.

A very sentimental, personal book that has very detailed and adorable patterns. I love the author of this book and I think it's great; what she does. Any skill level!
