Customer Reviews

ANITA JOGGERST is an advanced master gardener in a joint program of University of Missouri Extension and the Missouri Botanical Garden. She is editor of the Heartland Horticulture newsletter and a garden writer for the St. Louis Post-Dispatch. DON WILLIAMSON, who has turned a passion for gardening into his life's work, has a varied background in landscaping, golf course construction and management and now garden writing. He also has extensive experience in the design and construction of both annual and perennial beds in formal landscape settings. Don has a degree in applied horticultural technology and professional certificates in turf management.

I bought this plant book for my daughter who lives in Missouri. It has a very nice outlay of plants for her area with necessary info on each (the writer is very familiar with Missouri). It has wonderful color pix which mean a lot when choosing plants for the landscape. My daughter liked it and so did I!

i have purchased this book for myself and friends 3 or 4 times. it is compact, small, useful outside and shopping and helps with Missouri plants.

Not what I expected. I wanted more detail on how to take care of plants. This is not the book for that, in my opinion.

A great overview of what works well for us Missourians

great book. Hopefully I will have time to read it over the Winter

Saw this book reviewed in the newspaper and had to order it. It is small and has the most popular plants grown here. These are plants that will grow best and can prevent buying plants that will not survive the winter.

For gardening get the Becky Homan book. This only gives a plant recommendations for each category, and the info is shallow. This could have been populated by someone out of state just matching up the climate zones with recommended plans.

This guide provides great information for both the novice gardner and the experienced. It includes all the basic information: height, spread and hardiness but most interesting are the recommendations and descriptions of varieties available. The "tips" on where to plant and also special information such as "divide every 2-3 years to maintain foliage color" will help me to learn more about the care of my plants. The authors also note "Plant of Merit" certification which is helpful in selecting new plants. Overall a very worthwhile reference that will be used often.
