## Customer Reviews

I have been gardening most of my life and now live in sub-tropical Brisbane, and I find Doug's books have so much of value for me. Considering the difference in our respective climates, where he is dealing with cold, and I am coping with heat and humidity, it is interesting to find that there is so much in common. So don't be put off by thinking "but the climate is not the same" , there is a wealth of knowledge in his books. Buy them, you won't be sorry.

I love advice books that d don't either scare the bejesus out of me or treat me like I'm stupid. This is a good book. It'll get you started and to a point where you know what questions you want to ask of more advanced books later

I have always been a fan of Douglas Green and this book has really helped me to "figure out" some of the basics. Especially like the idea on how to plant cone flower (so don't forget where I planted them). Some simple but innovative planting information.

Doug Greens' publications (and his email newsletter) are very easy to understand, with great suggestions, wonderful photo illustrations, and very accessible. Highly recommended

I watched Doug Green's simple gardening techniques on Craftsby and he demystified gardening so well that I will try my hand at gardening one more time. This eBook follows the same common sense techniques and reinforces that gardening does have rules, but it is not rocket science. The Craftsby was visual and auditory, this eBook was visual, so it's almost time to get some hands-on learning!
