## Customer Reviews

So when I first heard that Loren "martial arts author" Christensen was putting out a book about ghosts and UFOs and whatnot, it was a definite, "wait... what?" moment. What I've always enjoyed

about Christensen's books are his ability to take very complex concepts (such as martial arts, meditation, nutrition) and filter them into a simple and understandable concept. No fluff and, more importantly, no mysticism. So this one kind of came out of blue. All that said, if you are a fan of Christensen's other books, trust me and check this one out. Christensen takes his vast law enforcement experience, gathers a team of folks with similar experience, and presents a collection of stories that will both interest you and possibly even creep the daylight out of you. This is a side of the law enforcement world you have never seen, heard of, and most likely have never even considered. Even if you, like me, are a skeptic of ghosts and aliens and everything related, give this a try. At worst you will be very entertained. And, who knows, maybe it will make you wonder if there really is something lurking in the dark...

Anyone who has stared into the night knows that it stares back. Anyone who has spend time dealing edges of humanity knows there are things beyond the edge. And like so many other things from life out in the extremes, you can't talk about it with 'normal people.' People who live deep in the safety of secular and modern life seldom have these kinds of experiences.

Great compilation of stories with great intros from Loren. I especially liked the personal stories added by the author. If you are into law enforcement, ghosts, UFOs, this is a great book.

Well worth the price. Having experiencing something like a few of these myself, I feel I fit right in the definition of a HSP, a highly sensitive person. I am very glad there professional men and women coming forward with their experiences. Buy the book even if you are only mildly interested in unexplained phenomena. These are not the wild ramblings of marginal people, but everyday soldiers and police experiencing strange things while performing their duties.

This was a very interesting book! The title of the book caught my attention right away and I knew I just had to read it as I worked in a prison for a lot of years. Each story in the book was fairly short and held my attention. It would definitely a good read!

This book covers a lot of ground in the paranormal world and tells the stories from reliable witnesses. It goes into ghosts and alien tales and for both it is very entertaining. As the title implies these are stories and if the book is judged on that I should give it a 5 star rating. The tales are told very well and put you on the scene as the stories unfold. I really enjoyed the book and when I got

going it was hard to put it down. I would definitely recommend this book if you're into reading tales of the paranormal. I'd definitely be a buyer if a 2nd book were to follow.

Thoroughly enjoyed these true stories of strange encounters with ghosts and otherworldly things. Hats off to the brave police officers and other law enforcement / service personnel who respond to these and all other calls to protect the public. Sometimes they get more than they bargained for.

I choose the rating due for its real contents.. I love the real stories of everyone's life experiences. I believe in ghosts, and other things that exist besides us. and to hear of others' real experiences let's me know that I am not the only one who has them too. Thank you for sharing yours, it is nice to see that I am not alone... Great read, I recommend it to everyone....and I will read this one over and over...I would love to meet the peel face to face some day, if it is ok with them.....agerhold1968@gmail.com is my email. Thank you. August 17th, 2016.
