Great book for young film makers

Kids are trying to make movies.

My 13 year old enjoys it!

Synopsis- Have you ever wondered how to make your own movie, or mini-film? Have you ever tried to get a movie crew started with your friends but didnÃ¢Â Â™t know how? Well, is this the book for you! Mr. Willoughby-filmmaker, teacher, and self-proclaimed film geek-gives you the step-by-step process of making your movie, from trailer to editing, all in one book! Are you up to the task? This book includes areas on learning the basics, making a film trailer, making a documentary, your first short narrative film, and much more!What I Thought- Mr. Willoughby has written a pretty nifty book. It teaches you how to do all of the cool stuff mentioned in the summary. The book gives good sound advice (literally and figuratively ;)). Mr. Willoughby put in several fun projects to try out and use as a starting point for your film-making career. There were easy-to-understand diagrams, and well-organized chapters. There was a wide assortment of topics covered so the reader gets a good understanding of the basics. There were a few parts of the book I thought could have been explained a bit more (remember the book is for Ã¢Â ÂœDummiesÃ¢Â Â•). For example, Mr. Willoughby used iMovie to edit his film, and he mentioned, amongst others, Microsoft Movie Maker for an alternate program, but it didnÃ¢Â Â™t explain benefits or drawbacks with either program. I

would have liked even just a small photo of a Movie Maker screen, with labels for the important objects. The majority of the content was very helpful and interesting to read. I really liked this book. I would recommend this book to a kid in your life you wants to gt into movie/video making.*NOTE I got a free copy of this book in exchange for an honest review

Great
