Carving For Kids: An Introduction To Woodcarving

Synopsis

The simple and beautiful art of woodcarving is adapted for children of all ages in this introduction to coaxing shapes and figures from solid blocks of wood. Requiring only a few tools and some inspiration, the projects in this collection are perfectly suited to building the skills it takes to work with wood. Safety and adult supervision are emphasized, but children will be able to complete the age-appropriate designs all by themselves. The graded projects range from carving a name stamp--for the youngest woodworkers--to carving a face--for teenaged craftspeople. The book also touches on computer-aided pattern-making, teaching children who face learning challenges, and methods for instructing kids of each age group--from elementary through high school. With its quick results and cumulative skill-building, learning to carve fosters hand-eye coordination and confidence as young carvers turn out unique handicrafts.

Customer Reviews

"Mr. Trudel is full of encouragement for keeping kids interested in what they are doing, so if you want to share a love of the craft, this is a very worthwhile way to do it." --WoodCentral.com

Robin Trudel is a computer consultant who writes articles for carving magazines and teaches woodcarving as a volunteer. He lives in Dracut, Massachusetts.

Great for kids and adults to learn whittling. Fun projects for you and your child to work on together.

Never let children use knives unsupervised! Kids can make toys for themselves or friends, or gifts for grandparents. I Highly recommend this to anyone that wants to learn a new and fun hobby!

Good detail in the descriptions with helpful pictures for every project. May be tedious for younger kids, depending on their focus, interest, and motivation!

Great learners carving book....for all ages. Simple and easily accomplished projects with clear step by step instructions.

As a novice, I made many bears from this book.....I can recommend this highly.....

My Mom and my Wife are both wood carvers. My grandson, age 11, expressed interest. We bought him a starter set for Christmas and this book to go with it. He's using the book and finds it very helpful.

Great ideas in here!

My 12 year old grandson really likes this book. He saw several interesting projects to make. There is a section on safety and also different recommended types of wood to be used for carving projects. Comprehensive and well laid out information.

Nice book pictures are handy to view what the writer is talking about. I am excited to work with my son that is 11 years old that has been asking to carve or work with wood.
