Aquatic Gardens Ponds, Streams, Waterfalls & Fountains: Volume 1. Design & Construction & Maintenance (Or The World According To Carp)

Synopsis

This book is an ongoing attempt to provide concise, practical and usable information for the layout, building and upkeep of fountains, ponds, waterfalls and streams. It is written for all; from the architect or designer to the installer to the end user. The sections of this book are arranged in logical order; with design considered first, elements of costs considered, construction procedures/choices, stocking and ongoing maintenance covered beginning to end.

Customer Reviews

This book is great for someone planning on building a pond. But, if you already have a pond, it may not go into details which you need. I needed a book that spoke about natural ponds and how to bring them back to life.

This book was needlessly complicated and much of the information was out of date. It was disappointing. I was looking for something that would help me to make decisions that would guide my renovation of my pond, and I thought this might give some practical tips on how to design and build a pond. Instead it was mostly filled with the author's opinions and was not clear enough to be useful.
