Customer Reviews

Great product for the average consumer. The information contained in this book is essential and provides consumers with a place to start so they ask the right questions if and when they need to hire an attorney to assist them in their matter.

Late night TV is always full of "debt consolidation" ads which really get me anxious and make me feel like I'm trapped in my misery. I almost got sucked into a few of them until a friend of mine told me about this book and how I need to read it before making any further financial decisions. I have to admit, I was skeptical at first and I felt like I knew everything. It turns out, I knew nothing! Among the other topics discussed in the book, which basically includes everything you need to know about consumer defense, were the various options available to people just like me. More importantly, I felt

ready to tackle these issues head-on with an open-minded, informed approach. This is quite possibly the most valuable piece of literature in my bookshelf, and not because the cover looks like it came from the U.S. Treasury. If you feel misinformed in all the things caused by the financial crisis, do yourself, your family, and your future a favor and give this a read. It stopped me from making some huge financial mistakes that could've put me in the hole for years and worse.

This is one of the most well-written, thorough books on Bankruptcy and Foreclosure ever! Believe it or not, it's very easy reading, full of great examples using real world scenarios to help you understand how the laws work. It's not written in yawn-inducing legal jargon, and I found myself reading page after page and almost finished all 350+ pages in one sitting! After reading it, I truly feel like I could almost represent myself in a foreclosure or bankruptcy case. This is a **MUST READ** if you are in, or considering, bankruptcy and/or foreclosure. In fact, read this before you go talk to a lawyer!

Very good book with valuable information.

I got myself in big trouble with a foreclosure. Turns out that bank shouldn't have lent me the money to buy a 250k house on my part time fast food worker paycheck. When the mortgage bills starting showing up, I was like "oh hell naw, I ain't gonna pay that!" so I ignored them. I mean, I needed money for dro and doritos, right. So anyway they were going to kick me out my crib. I told my moms about it, and she be all trippin' and shiz. She sent me this book. I don't have a lot of pictures, so I didn't really want to read it, know what I'm saying? But one day I had to take a massive dump and couldn't find my new issue of High Times to read on the throne, so I grabbed this. 2 hours later I be understanding all kinds of stuff about mortgages and debt and foreclosures and shiz. It helped me use some loop holes and get them telemarketing ass debt collectors to stop calling. The banks be desparate yo. They can't sell houses like they use to, so I'm able to stay in my place on the strength of some promises I made. I also figured out that if I sell some bootleg dvds on the side, I can probaly flip the money and buy more houses and sell them to some other trust fund kids I know. Anyway this book be written by some smart ass lawyering mofos. Get it and tell them creditors to step off son. Word.
