Customer Reviews

Don Ahrens is Professor Emeritus at Modesto Junior College in Modesto, California. The bestselling author of two Cengage Learning texts, Professor Ahrens received the Textbook and Academic Authors Association's McGuffey Longevity Award for the 9th Edition of his market-leading METEOROLOGY TODAY. He has influenced countless professionals in the field of atmospheric science as well as hundreds of thousands of students who use his books to better understand weather and climate. In 2007, the National Weather Association awarded Professor Ahrens a lifetime achievement award for these accomplishments.

This would be much better if there was a dedicated section for a glossary as opposed to going to the end of each chapter to find which page the definitions were on in the text.

I am in college studying to be a meteorologist, and this book covers basic material for the first two

semesters. It is well written and informative, from the nut and bolt basics to more fun topics like hurricanes and mid-latitude cyclones.

I enjoyed the material, it is packed with a lot of technical insight as it should be. I will be returning to it from time to time to reinforce the material. Great supplement to the class lecture.

An excellent textbook for intro weather and climate classes.

Its a good book. Chapters are well laid out and easy to understand.

The book does not work on the Kindle Windows 8.1 but works okay on Kindle Windows 7. It would be better if the content was enabled from the publisher.

Great Service & Value !

Excellent. Just what I needed to teach my class.
