Introduction To Polymer Chemistry, Third Edition

Synopsis

Continuing the tradition of its previous editions, the third edition of Introduction to Polymer Chemistry provides a well-rounded presentation of the principles and applications of natural, synthetic, inorganic, and organic polymers. With an emphasis on the environment and green chemistry and materials, this third edition offers detailed coverage of natural and synthetic giant molecules, inorganic and organic polymers, biomacromolecules, elastomers, adhesives, coatings, fibers, plastics, blends, caulks, composites, and ceramics. Using simple fundamentals, the book demonstrates how the basic principles of one polymer group can be applied to all of the other groups. It covers reactivities, synthesis and polymerization reactions, techniques for characterization and analysis, energy absorption and thermal conductivity, physical and optical properties, and practical applications. This edition addresses environmental concerns and green polymeric materials, including biodegradable polymers and microorganisms for synthesizing materials. Case studies woven within the text illustrate various developments and the societal and scientific contexts in which these changes occurred. Now including new material on environmental science, Introduction to Polymer Chemistry, Third Edition remains the premier book for understanding the behavior of polymers. Building on undergraduate work in foundational courses, the text fulfills the American Chemical Society Committee on Professional Training (ACS CPT) in-depth course requirement.

Book Information

Hardcover: 554 pages

Publisher: CRC Press; 3 edition (December 4, 2012)

Language: English

ISBN-10: 1466554940

ISBN-13: 978-1466554948

Product Dimensions: 1.2 x 7.5 x 10.5 inches

Shipping Weight: 3 pounds (View shipping rates and policies)

Average Customer Review: Be the first to review this item

Best Sellers Rank: #544,744 in Books (See Top 100 in Books) #119 in Books > Engineering & Transportation > Engineering > Materials & Material Science > Polymers & Textiles #556

in Books > Engineering & Transportation > Engineering > Materials & Material Science > Materials Science #584 in Books > Science & Math > Chemistry > Organic
