The Waterboxx Gardener: How To Mimic Nature, Stop Watering, And Start Enjoying Your Garden

Synopsis

STOP WATERING YOUR GARDEN FRUITS AND VEGETABLES!!! Is this really possible, without killing your garden plants? Yes, it is, with a completely new way of gardening - Waterboxx Gardening. The Waterboxx Garden can be watered only at planting, and can sustain itself through captured dew and rainwater, released without human effort to the plants below. Regardless of climate, watering is greatly reduced. In many areas, no manual watering is needed after planting. Waterboxx Gardening, explained in this book, allows you to begin enjoying the garden without constant watering, and to focus on its more engaging aspects â “ beneficial insects, composting, and of course â “the delicious fruits of your labor! Learn how to garden organically and with 99% less water - become a Waterboxx Gardener today!

Customer Reviews

I purchased 10 Waterboxxes from DewHarvest last year. My first use was to save a small live oak tree planted by the neighbor's third grader in a one acre field next to our house. Our town provides

all our third graders with a sapling as part of the school's science program. The tree was planted and promptly ignored while his focus moved to sports and video games. As a result, the tree was not receiving sufficient water as it tried to establish itself in the Texas heat. The little sapling was just barely alive when I asked the neighbor if I could experiment with the Waterboxx. Since installation of the Waterboxx, the tree has made a remarkable recovery and has almost doubled in size. The only time I added any water (3.5 gallons) was during the initial installation. I have essentially also ignored it ever since. The Waterboxx is truly an amazing innovation. It works! Exactly as described in this book. Plus, The Waterboxx Gardener book by Dr. Auman has opened my eyes to its potential for our vegetable garden. The harsh summers take a toll on our garden (as well as me and my wife). Watering is a full time challenge from June through September. The insights provided in this book will expand our use of the Waterboxx from the trees to the vegetables. I wish I had this book and its guidance last year! Thank you for providing your insights, Dr. Auman!

A must read for every parent raising small children. What a fabulous way to instill the circle of life. What a great hobby with purpose and value. .

A friend recommend this book to me because I was starting a garden and it had a lot of good information.
