Battlefields In Miniature: Making Realistic And Effective Terrain For Wargames

Synopsis

Like a good general, a good wargamer should have an eye for the ground. Just as the nature of the battlefield plays a central role in real warfare, so miniature wargames are greatly enhanced by realistic terrain. Besides, when you've spent hundreds of hours collecting and painting your miniature armies, they surely deserve ground worth fighting for. Master terrain modeller Paul Davies takes the reader through the process of creating a visually appealing yet practical terrain system. First the techniques of making the basic landscape are explained, then a series of projects show how this can be adapted to suit different periods or geographic locations (eg European farmland or Sudanese desert). There are then detailed chapters on adding vegetation, buildings, roadways, trench systems etc. The clear, step-by-step instructions are clearly illustrated by numerous specially-taken photographs of the work in progress and Paul's inspirational finished pieces.

Customer Reviews

Whether your building a war games table or train layout, these simple tips and ideas are perfect. Easy step by step ideas that look awesome when complete. Worth it!

If you're interested in making wargaming or diorama terrain then this book is worth a look. Some things I knew and some methods I've been using for years, but there were other elements that I hadn't heard of or even considered before and I'm certain I will use some of them in the future.

Davies' many articles have helped and inspired me. This book is great for the basics, but his articles in magazines have generally been more advanced and included very specific "recipes". I'd love a collection of his past articles, but would only recommend this book for someone fairly new to terrain making.

Great book, simple but effective tutorials that get more complex near the end, now all you have to do is make the stuff.

The book is very inspiring and full of ideas.

Excellent step by step coverage on how to make your war game table come alive with realistic landscapes and accessories while remaining workable within whatever rules you use.

It's great for what it is and great for preteen children is but to be honest, I didn't get anything really out of it at all. If you are prepared to do the work there is more realistic terrain guides on Youtube for free. To be fair it depends on how good you want your terrain to be. Having said that it's perfect for my 11 year old son.

This is a really handy guide with practical insights into some great terrain. I've only delved into it but even the sections I have read have been really good and got my thinking what project to tackle first.
