How To Build Military Grade Suppressors

Synopsis

New Design Suppressor for Military Grade Rifles Brand New!! Keith Anderson,renown for his quality suppressor books has completely revised this manual. It features a more efficient suppressor design than the previous edition and takes you step by step from raw material to a finished military grade suppressor. This suppressor works for AR-15s, .50 BMGs or other models in between. The book covers construction tools, materials and techniques. It even tutors you in the art of welding. It is a must have for serious silencer enthusiasts and if you purchased the previous edition you will certainly want this one. *Be sure to buy the companion DVD UPC# 793573814371. This is a must have tool to accompany the comprehensive publication by Mr. Anderson.

Publisher: Desert Pubns; illustrated edition edition (June 1, 2003)

Language: English

ISBN-10: 0879471956

ISBN-13: 978-0879471958

Product Dimensions: 6.3 x 0.3 x 8.5 inches

Shipping Weight: 8 ounces (View shipping rates and policies)

Average Customer Review: 3.1 out of 5 stars 71 customer reviews

Best Sellers Rank: #515,605 in Books (See Top 100 in Books) #160 in Books > Engineering & Transportation > Engineering > Military Technology #3427 in Books > Science & Math > Technology

Customer Reviews

As other say - This is all about improvised suppressors - all the same stuff you can easily find on line. Tubing, washers, sheet metal, shooting through it to bore a hole - that type of stuff. Don't waste your money.

Says nothing about the techniques for making k baffle systems or monocoil systems as true military grade suppressor are built instead insists on using tube and freeze plugs from a car and shooting the hole through the center for each plug not only is this the dumbest idea I've ever heard but is also misleading these are not military grade

I seriously doubt that the military uses automotive freeze plugs and muffler pipe to build their

suppressors! The title of the book is "how to build MILITARY GRADE SUPPRESSORS" It should be titled improvised suppressors from junk. If you are looking for Military grade information or even professional build information do not waste your time or money with this book! The title is clearly misleading!

This book not only provides improper but dangerous methods for testing but also rifle and pistol loads for creating the baffles. Also the methods used to assemble the suppressors is so primitive and out of date that it will lead to far more accidents and issues than normal suppression would.

Great Product

Well written

same

Do not buy! Fence post, freeze plugs, and window screen that's it. I just saved you money.
