Fatigue And Tribological Properties Of Plastics And Elastomers, Second Edition (Plastics Design Library)

Synopsis

Part of a series of core databooks within the William Andrew Plastics Design Library, *Fatigue and Tribological Properties of Plastics and Elastomers* provides a comprehensive collection of graphical multipoint data and tabular data covering fatigue and tribology. The concept of fatigue is very straightforward: if an object is subjected to a stress or deformation, and it is repeated, the object becomes weaker. This weakening of plastic material is called fatigue. Tribology is the science and technology of surfaces in contact with each other and therefore covers friction, lubrication and wear. The reduction of wear and fatigue and the improvement of lubrication are key bottom-line issues for engineers and scientists involved in the plastics industry and product design with plastics. *Fatigue and Tribological Properties of Plastics and Elastomers, 2e*, is an update of all that has changed in the world of plastics since the 1st edition appeared nearly 15 years ago, and has been reorganized from a polymer chemistry point of view. A hard-working reference tool: part of the daily workflow of engineers and scientists involved in the plastics industry and product design with plastics. The reduction of wear and fatigue and the improvement of lubrication are key bottom-line issues. The data in this book provide engineers with the tools they need to design for low failure rates.

Book Information

Series: Plastics Design Library

Hardcover: 312 pages

Publisher: William Andrew; 2 edition (December 24, 2009)

Language: English

ISBN-10: 0080964508

ISBN-13: 978-0080964508

Product Dimensions: 8.5 x 0.8 x 11 inches

Shipping Weight: 2.4 pounds (View shipping rates and policies)

Average Customer Review: 4.4 out of 5 stars 2 customer reviews

Best Sellers Rank: #4,385,840 in Books (See Top 100 in Books) #63 in Books > Engineering & Transportation > Engineering > Mechanical > Tribology #916 in Books > Engineering & Transportation > Engineering > Industrial, Manufacturing & Operational Systems > Industrial Design > Products #1355 in Books > Engineering & Transportation > Engineering > Materials & Material Science > Polymers & Textiles

Customer Reviews

Larry McKeen has a Ph.D. in Chemistry from the University of Wisconsin and worked for DuPont Fluoroproducts from 1978-2014. As a Senior Research Associate Chemist he was responsible for new product development including application technology and product optimization for particular end-uses, and product testing. He retired from DuPont at the end of 2014 and is currently a consultant.

This book fills the research I am working....fatigue design of plastic parts. It has all type of materials used in the plastic market with the tables and values of reference to perform an analysis of their own product.Thks!!

my brother need so cool product, very sharp and nice feel in your hand. A nice company to deal with .Hope my product and I get many happy years together .Would for sure buy another product from them. OK, there is do not have any problem. it is recommend. great!
