Northwest (SmartGarden Regional Guides)

Synopsis

A comprehensive guide to gardening in the Northwest -- includes Alaska, Colorado, Idaho, Kansas, Montana, Nebraska, Nevada, North Dakota, Oregon, South Dakota, Utah, Washington and Wyoming. Presenting a new way to think about gardening, the American Horticultural Society's "smart gardening" program teaches gardeners how to their own preferences and time availability, assess the possibilities of a location, and then create a garden that is in tune with the environment. A coding system, assigned to each plant, uses hardiness and heat zones, sun/shade, water needs, and plant size to help determine the perfect plants for any site.

Book Information

Series: American Horticultural Society Smartgarden Regional Garden Guides

Paperback: 420 pages

Publisher: DK ADULT; 1st edition (July 21, 2003)

Language: English

ISBN-10: 0789493667

ISBN-13: 978-0789493668

Product Dimensions: 9 x 0.9 x 10.9 inches

Shipping Weight: 3.1 pounds (View shipping rates and policies)

Average Customer Review: 4.4 out of 5 stars 5 customer reviews

Customer Reviews

Gave this as a present. My sister in-law loves it.....

Perfect gift for the Master Gardener who is gathering books for their gardening library.

We are new to the area and were looking for some help with what we could plant and how to take care of our plants during the upcoming seasons. Wonderful book, just what I was looking for.

This is a beautiful garden book! The pictures are usually of the plant rather than just one bloom as you often see. I have found the layout very useful, even though each plant may be listed more than

once. I like that it is broken down by category, which means that some plants are listed more than once (Blue Wave Lacecap Hydrangea is in "Shrubs for Shade", "Shrubs for acidic soils", "Large Shrubs", "Shrubs with blue, purple flowers" & "Shrubs for use as specimens"). I usually am looking for a plant for a specific place in my yard and with this listing I can see what is suggested for the conditions in that spot. It is a beautiful reference tool and I am planning on purchasing another copy to give as a Christmas gift.

Although this book is touted as a regional guide for the Northwest, it includes almost the entire NW quadrant of the United States, including Alaska. It is impossible to combine all the USDA Hardiness and AHS Heat zones found in the Great Plains, the Pacific Northwest, Rocky Mountains and the Southwest Desert areas and expect to have a useful catalog of successful plants. Like most DK books, there are many beautiful photos, however many of the same photos of individual plants reappear throughout the book. The photo of the blue lacecap hydrangea 'Blue Wave' appears five times, Scots Pine six times, and probably at least 50% of the plants, two or more times. Either the book could have been reduced in size or cost, or photos of other plants could have been used. At least then it would be a more useful photographic reference book.
