Customer Reviews

So disappointed in this book and definitely not worth \$6. I loved her previous book (Card and Toy Shop - it's really great) but this one looks like it's just been cobbled together. It's supposed to be an Art Studio - so why is there a cricket bat in it (?????). And cakes and a sandwich and embroidery and parcels? It's like she just added a whole lot of unrelated things just to make the book longer and more expensive. The easel is cute - although the instructions are incredibly confusing (I read them six times and it still doesn't make sense). At least there are instructions and measurements for it though - the 'instructions' for the table (which really makes the scene) are to make it the size you want (which isn't at all helpful if you're a new miniaturist or want the table to be proportionate to the setting). Would it have killed her to measure the table she made - which looks perfectly in scale and appropriate? Same with the rug - she says, cut it to the size you want and snip the edges (into a

fringe). A good project idea in theory, but I've seen more - and better - projects in magazines.
