## Customer Reviews

You don't have to be a Master Carpenter to do Woodworking nor do you have to be a crafts expert to create something special with wood. Before beginning, the tools of the trade are discussed with everything common like rulers to more specialized items like wing compasses. The Quality and types of wood are covered in great detail along with their best uses so that you'll understand which is most suitable for your creations. Important topics such as having a workshop and how to create one are necessary before you actually get into the last half of the book where you'll actually be building. Woodworks such as swords and desk racks are just some of the items you can create as a beginner.
