Selected By Extraterrestrials: My Life In The Top Secret World Of UFOs, Think-tanks And Nordic Secretaries

Synopsis

Bill Tompkins was embedded in the world of secrecy as a teenager, when the Navy took his personal ship models out of a Hollywood department store because they showed the classified locations of the radars and gun emplacements. He was personally present at the Battle of L.A. when a thousand rounds of ammo were fired at UFOs, and one of the Nordic craft may have selected him to be their rep in the evolving aerospace race. This book is a partial autobiography about his life to the beginning of the 1970s including some of his early work for TRW. Selected by the Navy prior to completing high school to be authorized for research work, he regularly visited classified Naval facilities during WWII until he was discharged in 1946. After working at North American Aviation and Northrop, he was hired by Douglas Aircraft Company in 1950, and when they found out about his involvement in classified work, was given a job as a to create design solutions as a draftsman with a peripheral assignment to work in a think tank. This work was partly controlled by the Navy personnel who used to work for James Forrestal, who was allegedly assassinated because he was going to publicly reveal what he knew about UFOs. Bill Tompkins was asked to conceive sketches of mile-long Naval interplanetary craft designs. Later, as he became involved in the conventional aspects of the Saturn Program that later became the Apollo launch vehicle, his insight to system engineering resulted in his offering some critical suggestions personally to Dr. Wernher von Braun about ensuring more reliable checkout using the missiles in their vertical position and also some very efficient launch control concepts adopted by both NASA and the Air Force. This story is peppered with very personal interactions with his co-workers and secretaries, some of whom the author believes to be Nordic aliens helping the good guys here on Earth. Towards the end of this volume of his autobiography, he sketches what he personally saw on TV when Armstrong was landing on the moon. Born in May 1923, Bill Tompkins is one of the few survivors of the big war who is still healthy, married to the same girl Mary, and is willing to tell his story about what he really did during his aerospace life in the 40s, 50s and 60s that relate to aliens, NASA and secrets that now can be told.

Book Information

Paperback: 460 pages

Publisher: CreateSpace Independent Publishing Platform (December 9, 2015)

Language: English

ISBN-10: 1515217469

Customer Reviews

I am 82 years old. At least one scientist mentioned in the book is known by me. I have been involved in the UFO field for many many years. After WWII a number of Douglass Aircraft people were part of a Boy Scout Troop in Brentwood California, only a few miles from Douglass Aircraft in Santa Monica. I remember my father telling me of one of the scientists being involved in very secret work at Douglass. My father was also friends with Don Douglass jr. In addition a close relative worked for a major NASA facility. I can tell you for a fact the sex activity was rampant during that part of the space program period. There are stories about this NASA facility which are very well known to those who follow the UFO field. I find the inclusion of the sexual side of the story disturbing to read in print but it was a fact and is part of history. In my humble opinion the information which Tompkins addresses in his book are true and accurate based on my experience and involvement in the UFO field. The U.S. is so much farther ahead in science and space than anyone can imagine. Please remember the statement of Ben Rich head of the Skunk Works for Lockheed, " We can do anything you can imagine. We can take E.T. home." Think of that.

Whistle-blower=hero! Great disclosure of multiple aerospace black projects for truth movement. Now the whistle-blowers of the SSP like Corey Goode and Randy Cramer, Michael Relfe have more information in their camp to substantiate their claims by this disclosure. Tompkins' Think Tank designs and plans explain places thousands have dwelled and worked on Mars and in the solar system. Someone should do a round-table interview and post on Youtube with William Mills Tompkins & Randy Cramer, who lived at Forward station Zebra (Horseshoe design) quite far from Aries Prime and discuss the Naval Base city living and day to day living, command centers and technologies and the classes of Naval Space ships that Tompkins conceived in his plans! Would be so interesting and appreciated! May Surprise readers: Nazi syndicates still thrive Ran across a name of German friend's Dad in the book. He was a Nazi aerospace engineer from Operation Paperclip post WWII. These are husbands, grandfathers, friends, OUR neighbors. We are in this

together! There are hard to read parts: Key Club...Occult behavior and unhealthy sexuality, manipulation of the engineers! People who are abducted or vanish! Deals to exchange ET technology allowing syndicates to abduct humans for DNA. But to heal we must accept these dark parts of the narrative...The leadership giving up our free will to allow us to be in this master slave arrangement with the reptilians-enough already. We need to grow up, move on and raise our consciousness to heal and enter the golden age and be a good galactic neighbor and custodian of earth.

Deeply troubling to learn about the truth of ET and UFO reality. A highly revealing work, it is absolutely a 'game changer' in relation to our understanding of this earth-shaking truth. Where has all of our tax payer dollars gone. . . .? Isn't it about time, we be informed by our government officials about what we as taxpayers have achieved via development of ET technology. This book is sexually very explicit and it may detract from the validity of the material, but the ET influence on the human mind can be measured by these sexually-influenced outcomes of R & D. A very unusual book about a highly unusual topic, a must read, if you dare.

This book is very significant but hard to read. It is written as first-person narrative of the author's career as an engineer and systems designer deep within the black-budget world, and features a lot a "reconstructed" office conversation. The contents of the story are astounding, but Tompkins is much more gifted as an engineer than a writer, and the flow of events and speech is disjointed and contrived. Special jeers must be awarded the editors (there are two) for horrible proofreading and structuring; missing quotation marks, odd section heads, and poor formatting leaves the reader disoriented by conversations, and there's little sense of chronology or direction in the story itself. That said, the story should be read and taken seriously (however weak a writer, Tompkins seems truthful); it will alter your reality.

I loved this book. I am glad that the USN has authorized Bill to come forward with his story. Just wish he would include more of his experiences with his lovely secretaries (beautiful blonde goddesses, intelligent, nordic looking extraterrestrials). God bless America! Thank god for these ETs to help us counter balance the negative influence of the reptilian looking ETs which have infiltrated the Nazis/CIA/USAF cabal (see book: the US Navy Secret Space Program by Dr Salla). It's really refreshing to see the attitude these beautiful human looking ETs have towards us and their desire to see us succeed with clean energy and life extension technologies. When reading

this book, Charles Hall's book; Millennial Hospitality came to mind, another great book on tall white ET's who live on underground bases I believe in the Nevada desert, who literally treats us humans like pets (to the point of putting us down if they get too afraid when approaching us), great job USAF for aligning with these *\$%##@. God bless the Navy! I hope their efforts towards full disclosure comes to fruition so we may finally become the Star Trek civilization we are destined to be.
