# Hydroponics For Beginners: Create A Hydroponic Growing System In Your Own Home

## Synopsis

Are you going to build your own hydroponic system? Do you want to improve your knowledge of the theory and practice? Whether you are using hydroponic systems like Wick Systems, Deep Water Culture (DWC), Nutrient Film Technique (NFT), Ebb and Flow (Flood and Drain), Aeroponics, Aquaponics or the well known Drip Systems that is widely used in urban organic gardening - this book will explain it all and give you the guidance that you need. This new book, All you Need To Know to Grow Anything, gives you a great insight into what hydroponics is, how to build your own system and pitfalls that may be on the way. This new book, Hydroponics For Beginners, gives you a great insight into what hydroponics is, how to build your own system and pitfalls that may be on the way. The chapters contain knowledge on: - History of hydroponics - The basics of different hydroponic systems - How to control your pH - Correct nutrient solutions - What lighting do you need? - What growing media materials are best to grow in? - How do these growing media look and act? - Common pitfalls and pesticides to watch out for! - And much more! | Hydroponics For Beginners is a must-have for anyone who is interested in Hydroponics and the culture around the phenomena surrounding it. Get your copy of, Hydroponics for Beginners, now.

## Book Information

Paperback: 78 pages

Publisher: CreateSpace Independent Publishing Platform (June 2, 2017)

Language: English

ISBN-10: 1547134585

ISBN-13: 978-1547134588

Product Dimensions: 6 x 0.2 x 9 inches

Shipping Weight: 5.9 ounces (View shipping rates and policies)

Average Customer Review: 3.0 out of 5 stars 2 customer reviews

Best Sellers Rank: #525,612 in Books (See Top 100 in Books) #50 in Books > Crafts, Hobbies & Home > Gardening & Landscape Design > By Technique > Hydroponics #71 in Books > Crafts, Hobbies & Home > Gardening & Landscape Design > Greenhouses

## Customer Reviews

Stephen Miller is a best seller author and lives in Michigan with his beautiful wife, a hyperactive dog, two arrogant cats, and one ugly mortgage on the house..

I am disappointed. I am attempting to grow a hydroponic garden, my first. I'd like to do it right. This

is the second book I've purchased on the subject, and the level of help for starting a hydroponic garden is far below that of a Youtube video. I hoped to have the video info in print form to refer to it more easily. Maybe if Mr. Miller watched some videos he would get a better idea of what useful info would be. For example, fertilizer. One wouldn't have to look far to find exact formulas for tomatoes, lettuce, etc, and a list of merchants. This is something that would have made this a better book. Another concept is vertical aeroponic. I watched several videos on this. Big problem. The ones that tell you how to do it yourself keep saying "Drill holes in a pvc pipe." Not all of us can do that. Finally one video pointed out that the store will cut the pvc pipe to any length for you and you can use "y" and "T" joints as places to put the net pots and connect the vertical pipe to the drain pipe. That would be more helpful than just alerting me to a variety of hydroponic techniques. So I took away little useful info. Or even references. No more books for me.

As far as I know (and I have bought myself a couple of books about this subject) this would be the best book for anyone who wants to begin with Hydroponics. It gives the reader a good understanding of how hydroponic system works and how they can be built, as wells as the difference between hydroponic systems etc. It also covers things that can go wrong and things you need to pay attention to when you are about to face setbacks (like we all do at some point). Get this book, I recommend it for everyone to have at home..Since you are going to need a way to keep track of your harvest, I would also recommend that you buy a logbook or diary at the same time..
