Customer Reviews

A very interesting book. First of all, the author is not a nutcase. He doesn't have prophetic visions of doom or predictions of the zombie apocalypse to peddle. He points out there are many different local or regional disasters that can and have disrupted the normal way of life for days or weeks at a time. Prepping puts you in position to survive these events. His style is very easy to follow. A conversational tone and illustrations from his own experience makes the author very human. The book is a good beginning resource. It surveys areas such as food, power, health care and defense. It presents numerous options that are available and discusses the strengths and weaknesses of each. Often he intends to start the thought process and provides other resources where you can pursue the ideas further. I enjoyed this book very much.

This is certainly a book that's meant for providing essential information and how-to's for prepping when disaster strikes (or when SHTF). Yet it's well written and engaging. In the beginning, it encourages you to ask the fundamental important questions so you can realistically prepare. And then it goes into the food prep, locations, storage, emergency procedures, bug out bags and so many little practical tips as well (eg. using a crayon for a candle is something I never would have thought of). The sheer amount of information in this book can be overwhelming at first: but what's more overwhelming would be being unprepared when the SHTF. This book is totally worth it and may be a life-saver if that time comes.

Looking at the deadly weather and natural cataclysms hitting countries across the world in recent months, I thought we needed to create a shelter and some reserves in case something happens in our homecity too. And this book was so helpful in that extent. Especially the part about the good storage, Like what to store and how to store it properly. And though some tips seem kinda too much a Hollywood catastrophe scenario, overall it offers a myriad of helpful and valuable tips for those who like being prepared for everything including the SHTF

A perfect and necessary book for everyone. The author devoted his material to the preparation for probable human-made disasters or natural disasters, writing a book on survival in the current extreme conditions. I liked the valuable advice that the author shared, especially on the creation of an emergency backpack for each member of the family, as well as tips on preparing stocks for this emergency. I recommend a manual that can save you and your family in a situation of urgency.

Bought this book yesterday and finished it just a little bit ago, It is very informative and helpful, It's full of all sorts of tips, tricks and tactics for surviving a SHTF scenario. As expected a small chunk of this book didn't pertain to me as I am in an urban area, But still valuable information to learn regardless. Only reason for me knocking a star off is due to the more than several grammatical errors. I am never one to be fussy but it got to the point where it started becoming noticeable. Nothing against the book but it must be mentioned. Over all great read and I would surely recommend it!

Excellent book to learn about how to prepare yourself and your family for any disaster. It goes into detail about exactly how to be ready, but it is not just a list of stuff to stockpile. It teaches you how to think like a survivalist so you can make the right call when the chips are down for real. The book is full of useful tips, and I recommend it to everyone!

I am just starting with the whole prepping process. I am so glad that I chose this as my first book because the author writes authoritatively from his experience in preparation and maintenance in a state of readiness. From this perspective he passes on invaluable tips/suggestions and lists which although quite comprehensive (immediate vs long-term prepping for urban and suburban dwellers) obviously cannot cover the "how to" of everything. For this reason he suggests the reader to prepare himself by buying physical books to fill the gap (such as how to can or dehydrate food) as well for survivor prep arsenal. I highly recommend!

Very good compilation of recommendations, that will help you and your family to feel secure t time of possible disasters. In this book you will find a lot of tips for different situations. They are very clear and it's easy to follow them. Also thanks a lot for DIY part.
