# Vlsi Analog Signal Processing Circuits

## Synopsis

This book is based on a collection of the past exams for the Vlsi Analog Signal Processing Circuits class (Eee598) the author offered in the School of Engineering at Arizona State University. The topics cover various aspects of the design, analysis and application of Vlsi analog signal processing circuits. This book is intended to be used together with the Vlsi Analog Signal Processing Circuits textbook by the same author. It can also be used alone for the experienced readers.

Dr. Hongjiang Song (Tempe, AZ) is a lecturer with the School of Electrical, Computer, and Energy Engineering at Arizona State University, where he has taught a series of circuit design courses in VLSI Analog Signal Processing, VLSI High-Speed I/O Circuits, and Structural VLSI Analog Circuits since 2002. Dr. Song earned his PhD from ASU and has been working in the VLSI circuit industry as a senior design engineer with Intel Corporation since 1994. --This text refers to an out of print or unavailable edition of this title.
