Estimating And Costing For Interior Designers: A Step-by-Step Workbook

Synopsis

Math is an essential component of the interior design profession. Estimating and Costing for Interior Designers teaches readers a logical process for calculating materials and estimating the costs of installed products based on their math calculations. Utilizing step-by-step examples and worksheets, this text simplifies the math used in the interior design field. Sample problems and exercises take the calculations of quantities needed one step further to actually applying material and labor costs, in order to discover the installed costs of the specified products.Clear sections cover wall and ceiling treatments, window treatments, soft fabrications, upholstery, flooring, and cabinetry and countertops. They include photographs of the product before, during and after installation.

Customer Reviews

â œI am thrilled with this book and have defined one of my business goals for 2015 as developing a creative team who are â ˆexperts' at what we do. This book is going to help us on our way! I can't wait to start using the worksheets.â • â •Heather and Scott Harkovich, Owners of Heather Scott Home & Design, Heather Scott Home & Design

Diana Allison is an interior designer and principal of her own firm, Allison and Associates Interiors. She has over 25 years of experience as an interior designer and recently spent 12 years teaching in the interior design department at Johnson County Community College, Kansas, USA.

This is a great book. I am in my second year of Interior Architecture and Design and this comprises what I have already learned and what I will be learning all in one place. The templates included are helping me to understand calculating amount of materials needed and what I should charge and consider when charging.

Covers a lot of products, provides helpful examples and tips.

It was a good book that gave you the skills to estimate the cost of interior finishes for interior designers.
