George R. Dekle, Sr., is a retired prosecutor who now serves as legal skills professor at University of Florida Levin College of Law, Gainesville, FL. His published works include *Prosecution Principles: a Clinical Handbook* and *The Last Murder: The Investigation, Prosecution, and Execution of Ted Bundy*.

I have had the honor of meeting Prof. Dekle twice and I have been a knockout prosecutor ever since. If you want to know how to be a prosecutor you need this book. Prior to reading this book I was floundering in my efforts to be a good prosecutor. After reading this a book I started this year off with two the major crimes convictions. Prior to the book I really did not know that I knew nothing about prosecuting. His three part method of prosecuting works. I used it in my previously mentioned

trials and found that I had not only direction for my case but was able to better show the defendant's guilt. Most importantly, Prof Dekle is "from these parts" and can teach you how to connect with the jury. Although I wish he were a professor at the time I attended law school, his book reveals God given wisdom for a time when defense lawyers are stopping at nothing to "get the guy off." GET THIS BOOK if you want success as a prosecutor.

Thank you Mr Dekle. Your book is full of good advice.

Great book

good book

I bought it as a gift for some one else. I can not accurately give a rating for the book

I am an adjunct Trial Advocacy professor at S.M.U. and believe that this book superbly fills the void in trial literature for prosecutors. The author, a legal skills professor at the University of Florida, has written a highly relevant and readable text for any prosecutor--both new or experienced--who wants to excel in the courtroom. From the first page, it is clear that Dekle brings to the reader insights and lessons learned not only from his teaching experience but his years of being a long time prosecutor prior to his current job. The book covers the basics of trial skills but also focuses on the particular needs of prosecutors such as how to build helpful relationships with law enforcement, strategies for plea bargaining, how to decide whether to indict a case or not, criminal discovery, and ethics. Moreover, as a former prosecutor in Washington, D.C., I found the examples (both from real cases and hypotheticals) to be very relevant and memorable. It is also refreshing to see a textbook that combines a discussion of the history of trial practice with modern techniques. Finally, the table of contents makes it very easy for any prosecutor to find help in an emergency during trial or to study a particular topic in depth when time permits.
